Notes

1. All parameters NOT specially mentioned are measured at 230VAC input , rated load and 25°C of ambient temperature.
2. Tolerance: includes set up tolerance, line regulation and load regulation .
3. The power supply is considered as a component that will be operated in combination with final Equipment. Since EMC performance will be affected by the complete installation, the final equipment manufactures must be-qualify EMC Directive on the complete installation again

■Mechanical Specification

※Input Rubber cable H03VV-F 3G 1.0mm², the green /yellow cable connect with (FG), Brown with AC (L), Blue with AC(N)

※Output Rubber cable H03VV-F2 1.0mm², Red is output(V+) Positive, Black is output (V-) negative. Connected to LED Lamps.

※Please make sure you connect these correctly otherwise your product will not function correctly and could be damaged.

※Note: Any other requests we can customized.

■Dimming Operation

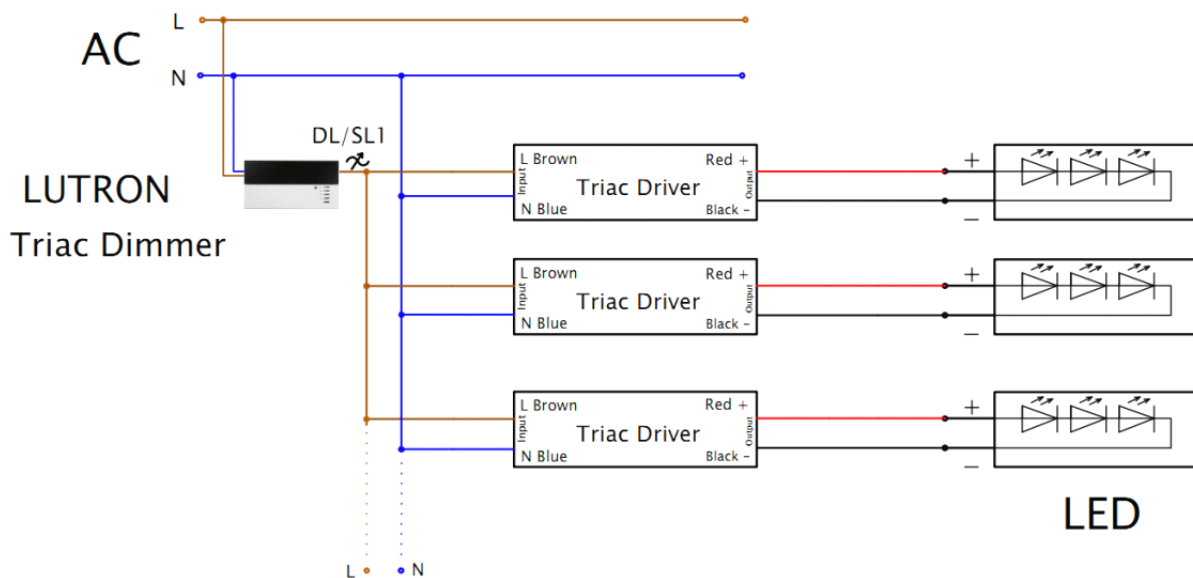

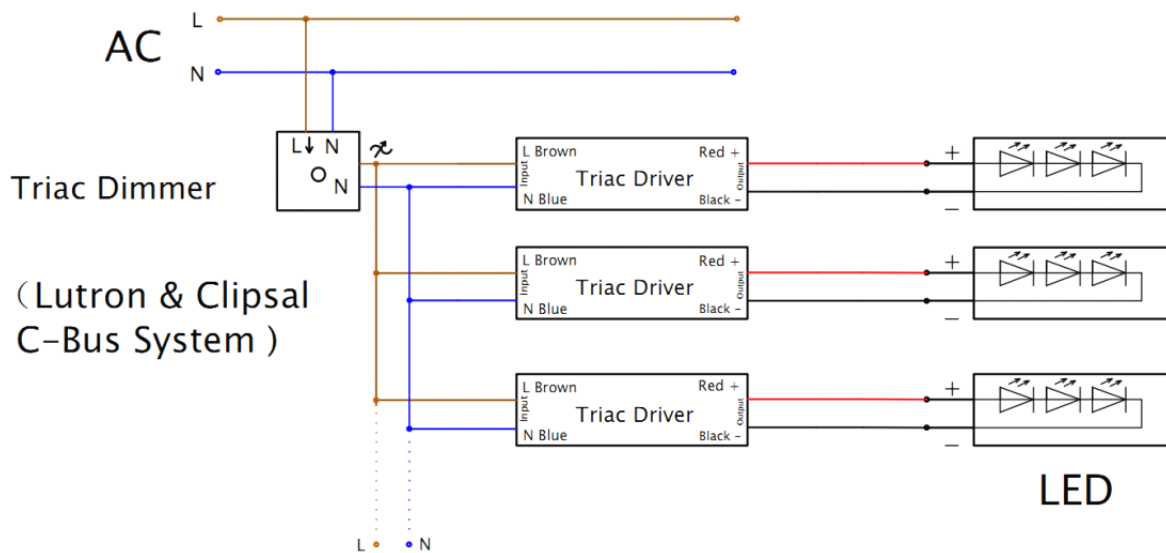

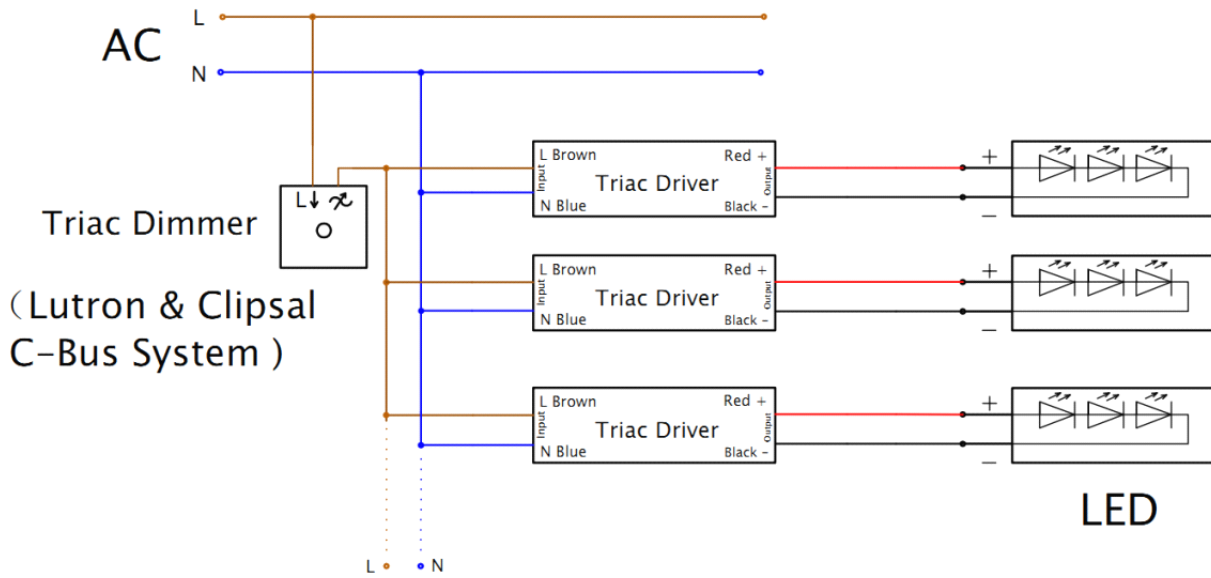

※Output constant current level can be adjusted through input terminal of the AC phase line(L) by connection a triac dimmer.

※Compatible with Leading edge and tailing edge triac dimmers.

※please try to use the small power dimmer, have access to a wider dimming range, high-power dimmer is difficult to achieve the output current to zero
